

5 Powerful Natural Anti-Inflammatories

Be Active Again ...Live Pain Free

This amazing cream gives hours of pain relief right where you need it most! Made with 7 powerful Essential Oils that penetrate all the way down to the source of the pain. Many people report complete pain relief within just a few minutes.

Simply apply on the area of pain 2 to 4 times a day depending on the pain at first. As the healing process penetrates you will be able to reduce the application.

At night apply a small amount on the bottom of your feet. The feet have an abundance of receptors to the body and **ThermaMax™** will go into the entire body in 20 plus minutes, going down 7 layers of the skin and oxygenate the blood cells resulting in better circulation and healing.

ThermaMax™ Healing Properties:

- Anti-Itch
- Antibacterial
- Antifungal
- Anti- Inflammation
- Anti Muscular Spasms

Boswellia Seratta: Boswellia seratta is also known as frankincense. Extracts of Boswellia serrata have been clinically studied for osteoarthritis and joint function, particularly for osteoarthritis of the knee. Positive effects of Boswellia in some chronic inflammatory diseases including rheumatoid arthritis, bronchial asthma, osteoarthritis, ulcerative colitis and Crohn's disease have been reported due to its potent analgesic, anti-arthritic, anti-proliferative and anti-inflammatory effects that can reduce the pain and inflammation of joints.

Curcumin: Turmeric is a powerful spice used widely in India both for its taste-enhancing aspects and its ability to heal. This connection between turmeric and arthritis exists thanks to one active compound in turmeric known as curcumin. This compound possesses anti-inflammatory and anti-arthritic properties, allowing it to be used as an effective natural arthritis treatment. Curcumin's ability to inhibit several enzymes involved in the onset of inflammation, including cyclooxygenase-2, or COX-2, makes turmeric rank #1 among any natural arthritis treatment. Since curcumin can suppress the enzyme COX-2, the production of prostaglandins – compounds that trigger inflammation and cause swelling and pain - is reduced. This makes curcumin a natural COX-2 inhibitor and because it has no known side effects it is a much safer choice than Celebrex which is a drug similar to the problematic Vioxx™.

Arnica: Arnica is a plant found in the mountainous areas of the United States and is great for bruises, sprains, soreness, swelling, and for the relief of arthritis, joint pain and muscle pain.

Elderberry: Elderberry, also called elder flower, is native to Europe, but have been naturalized to the Americas, and have a long history of medicinal use, particularly in England, where it is commonly used to make elderberry wine and pies, and was once referred to as "nature's medicine chest." Elderberry has compounds called anthocyanins, which have an anti-inflammatory effect, thus reducing aches and pains.

White Willow Bark: White willow has been used to combat fevers and pain for thousands of years. Willow bark may be the oldest herb known to treat pain and inflammation...the oldest recorded use is by Chinese physicians in 500 B.C. The inner bark of the white willow tree contains salicin, which is changed to salicylic acid in the body. The compound in aspirin, acetylsalicylic acid, is derived from salicylic acid. Herbalists use white willow much the same as aspirin to reduce fevers, pain, and inflammation in conditions such as arthritis. White willow works slower but lasts longer than aspirin and has no gastronomic side effects due to the large amounts of tannins that protect the stomach.

DRUG FACTS

Active Ingredients:

Menthol 10% - Camphor 3%

Purpose:

Pain Reliever, Antipruritic, Anesthetic

Uses: For temporary relief of aches and pains of muscles and joints due to • arthritis • muscle strains • backache • sprain • knee pain • hip pain • can help distract pain.

Warnings: For external use only. Keep out of reach of children. Use only as directed. Certain persons can develop allergic reactions to ingredients in this product. If symptom being treated does not subside or if redness, irritation, swelling, pain or other symptom develop or increase, discontinue use and consult a doctor. Do not tightly wrap or bandage or use other topical preparations or heating pad. If pregnant or lactating, consult a doctor before use.

Directions: Adult and Children 12 years and older: Apply generous layer to the affected area not more than 3 to 4 times daily. Children under 12 years of age: consult a doctor

Other Information; Store at room temperature – avoid excessive heat.
